Capability Statement

KeON Systems, LLC (KeON Systems) is an IT Service and Management Consulting Company that provides comprehensive IT management services, cybersecurity services, IT governance strategies, cloud computing solutions, IT asset management solutions, and supply chain management solutions, to support federal government agencies, prime contractors, state governments, local municipalities and commercial clients. Additionally, KeON Systems is a Small Business Administration (SBA) certified Service-Disabled Veteran Owned Small Business (SDVOSB) entity. Members of our team possess a combination of advanced degrees, industry leading certifications, security clearances, and experience leading and supporting organizations in the government and private sector.

Core Competencies

- **IT Service Management** – helping organizations ensure that IT services are delivered in a consistent, cost-effective, and customer-focused manner, ultimately contributing to the success of the business.
- **Cybersecurity Support** – helping organizations protect their digital assets, maintain operational resilience, and safeguard sensitive information in the face of evolving cyber threats.
- **Cloud Computing** – supporting the way organizations build, deploy, and manage IT infrastructure and applications, driving agility, efficiency, and innovation across various industries.
- **IT Asset Management** – enabling organizations optimize their IT investments, minimize risks, and improve operational efficiency by ensuring that IT assets are aligned with business objectives and supports evolving needs.

Past Performance

- Provided Risk Management Framework (RMF) support to DoD and Intelligence Community programs, to include Assessment and Authorization (A&A), Information Systems continuous monitoring, change management risk assessment, and vulnerability management.
- Deployed IT hardware and software, and configured network equipment to support the operations of a medical clinic.
- Cloud migration of non-profit organization's data, applications, and other business elements from on-premises infrastructure to cloud-based services.
- Managed inventory processes, asset tracking, reporting and analytics to support operational readiness of deploying servicemen.

Our Values

Client-Centric Excellence | Expertise and Innovation | Integrity and Accountability
Collaboration and Partnerships | Community and Sustainability
